When it comes to pocketknives, it can be hard to decide which one is right for the job. Whether you're a knife enthusiast or just looking for the perfect knife for your next hunting trip, this comprehensive guide will help you make an informed decision. We'll discuss the best hunting knives, how to sharpen your knives, and must-have knives for enthusiasts.

### **The Best Hunting Knives**

If you're looking for a knife that can handle any outdoor activity, then a hunting knife should be at the top of your list. Hunting knives have durable blades that can handle tough tasks like cutting rope, skinning wild game, and even chopping wood. Popular brands include Buck Knives and Gerber Knives. Both brands offer high quality blades with comfortable handles in a variety of styles and sizes.

### **How To Sharpen Your Knives**

Sharpening your knives is important if you want them to last longer and perform better. The most common method for sharpening a blade is by using a whetstone or honing rod. Start by laying your blade flat against the stone at an angle of 20 degrees from the edge of the blade. Then move your knife across the stone while applying only light pressure until both sides are sharpened evenly. You can also use an electronic sharpener or take your knife to a professional sharpener if you don't feel comfortable doing it yourself.

### **Must-Have Knives for Knife Enthusiasts**

If you are serious about collecting knives, there are certain types that you should consider adding to your collection. These include tactical folding knives, Swiss Army knives, Damascus steel blades, and butterfly/balisong style pocketknives. Tactical folding knives typically feature sturdier construction than other pocketknives and are ideal for self-defense situations or everyday carry (EDC). Swiss Army knives are multi-functional tools with multiple blades and tools included in one convenient design; they make great EDC options as well! Damascus steel blades have been used since ancient times; now they are made entirely from stainless steel for modern durability without sacrificing their classic look. Finally, are butterfly/balisong style pocketknives; these designs feature two handles that fold over each other when closed making them ideal for flicking open and performing intricate maneuvers like twirling and spinning tricks!

### **Final Thoughts:**

Pocket knives come in all shapes and sizes so it's important to do some research before making a purchase decision so that you get exactly what you need out of your new tool! Whether you need something durable enough to handle tough tasks or something fancy enough to show off at parties, this comprehensive guide has something for everyone.
